DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it should be in a separate page in compliance with US practice. Correction is required. See MPEP § 608.01(b).

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-15 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 and claims 2-15 dependent therefrom, contain disjunctive descriptions for elements that are clearly not equivalent. The recitation "either on the same nuclei or on different nuclei" is indefinite. A similar situation arises from the disjunctive "characterization of the sample or interim result". Applicant is urged to revise the claim language to comply with US practice. Clarity of the claims should not rely on parenthetical matter.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Driehuys P.N. 6, 696, 040.

Driehuys discloses a diagnostic procedure using 129XE spectroscopy to detect pathology in vivo. Applicant's attention is directed to the flowchart of Fig. 3 and corresponding description in the specification. A sample is hyperpolarized as described in conjunction with steps 300 and 301. NMR spectroscopy is performed in the sample using a sequence of RF pulses in step 330. Subsequently, spectra of the sample are obtained (see step 360) and such spectra analyzed to obtain a characterization of the sample as explained in reference to step 370.

Note that the polarization of the sample can be obtained in several ways including DNP as clearly described in line 37 of col. 7. Driehuys meets all the limitations of the claims at issue.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

Art Unit: 2831

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hennig and Lucas et al., disclose DNP-NMR spectroscopy methods. Note the abstract of each of their disclosures.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Louis M. Arana whose telephone number is (571) 272-2236. The examiner can normally be reached on M-Thurs. Fridays Off.
